

sedus

secretair

Working and feeling good wherever you want.

**Versatile, flexible and discreet:
a perfect example of a solo desk.**

The personal secretaire is back – re-interpreted for the modern age and elegant at the same time. The Sedus *secretair* is a versatile mobile station for temporary working and stands out due to its light, uncluttered appearance. The fresh design and the high-quality materials ensure privacy and a homely ambience. It is not only in open-space structures that *secretair* creates places that invite people who need somewhere to concentrate closely on their work and where they also feel at home.

Specialist in versatility.

Thanks to its contours and its mobility, *secretair* can easily be adapted to accommodate new requirements. From circular groupings that facilitate communication to arrangements where they are placed one behind the other to encourage maximum concentration.

secretair can be used to design the most varied of scenarios and be re-arranged in just a few minutes. The built-in equipment is also multifaceted. Light, shelves and electrification make *secretair* into an autonomous workstation for the most varied of activities.

Mobile. Due to two smooth-running castors, the position and orientation of *secretair* can be effortlessly altered.

Communicative. On request, *secretair* can be supplied with an attachable multiple socket strip for notebooks, tablets etc.

Focused. As an option, *secretair* can be equipped with a luminaire that supports concentrated working.

Uncluttered. Directly under the working surface, there is a drawer for personal belongings or pens etc.

Practical. The metal shelf also serves as a magnet board, while the variety of optional colours enables individualisation.

secretair can be individualised stylishly with selected surfaces and high-quality real-wood veneers. Moreover, the metal shelf, which also serves as a magnet board, can be used as a distinguishing colour feature. A coherent design concept with which *secretair* bridges the gap between main office and home office.

Real wood veneer

E10 white ash

E46 light grey ash

H11 natural maple

E41 natural ash

F31 natural cherry

B26 natural beech

C11 natural oak

B21 mid brown beech

G11 natural pear

D12 natural walnut

D11 dark walnut

B23 walnut varnished beech

C17 wenge varnished oak

E45 black ash

Melamines

A14 pure white

K74 natural white

K58 arctic white

K69 acacia

K60 maple

K59 beech

K72 olive

K66 walnut

K65 zebrano

K71 ebony

K16 dark grey

K70 graphite black

Linoleum

L20 black

Likewood melamine

N10 oak

Eye-catcher. The oak-like melamine has the optical and haptic characteristics of a veneer and, at the same time, all the advantages of melamine: robust and lightfast.

Membrane covers

M67 white

M69 creme

M70 black

M71 anthracite

Permanently attractive. The lightweight transparent cover, made with the three-dimensional knitting method, is highly elastic and is always in shape.

Metal shelf

white

sand

raspberry

black

Sustainability down to the smallest detail.

Sustainability and “Made in Germany” quality are among the central corporate principles that Sedus has adhered to for more than 50 years. Principles that the Sedus *secretair* also embraces and that reflect recycling-oriented product design, ecologically tested materials, resource-sparing and energy-conscious manufacturing and permanent quality tests.

Solvent-free powder coating instead of conventional paint is therefore used to make *secretair*. In addition, only three different types of material, namely wood, metal and fabric, are used for *secretair*. These can easily be sorted later into different substances and recycled.

You will find more information at www.sedus.com/en/ecology

Sustainable and near.

Real-wood veneers from sustainable local forests are not only fascinatingly beautiful but also reduce the number of kilometres over which the wood has to be transported.
